

Environmental Policy

We recognize the responsibility of business leaders to actively monitor and minimize the negative environmental impact of their day-to-day operations in a world of limited resources. We accept this stewardship and it is our intention to optimize the resources under our influence.

Marquette implements its Environmental Recycling Policy through:

- Actively recycling paper and aluminum created during normal business operations
- Donating used computer and electronic devices to not-for-profit entities
- Encouraging electronic correspondence, when feasible
- Reviewing mailing and distribution lists to delete out of date subscribers
- Printing client reports on both sides of paper
- Requesting investment manager, custodian, and other service provider presentation materials be printed on both sides of paper
